October 17, 2010 While at the Thornwood Town Canter An examination of the Patrol units on scene showed the Pleasantville units were equipped with video systems and one also had a License Plate Reading System. Information was taken on the patrol car video systems located in 2 Pleasantville Police cars at the scene. Hard drives in these units could not be removed at the time due to the fact they were locked to the mounting platform in the trunks of the vehicles. **The camera in Car 58 had the cables disconnected from the back of it.** The License Plate Reading system in Pleasantville Car had a laptop mounted in the cars cabin which was removed and secured by this investigator.

October 18, 2010 I Conducted an examination of the License Plate Reader (LPR) by removing the hard drive from the laptop and examining the contents. Located images of license plate and vehicle taken on the morning of the incident. Photos were burned to disk and tot for further investigation.

October 20, 2010 After consultation with the manufacturer of the in car video system utilized by the Pleasantville PD I secured the keys to the units and removed the hard drive units from the systems. **An examination of the hard drives shows no video files recorded on the date of the incident on either of the in car systems. Log records for system activity indicate the system time and date was set correctly.**

Pleasantville car 58 was equipped with a License Plate reading system and an in car video system. The video camera in this car was disconnected with the cables hanging loose behind the windshield mounted camera. The video system in this car showed no video recorded on the date and time of the incident. The LPR system was recording images at the time of the incident and all images from this system for the time of the incident were downloaded and burned to disk for further investigation. Pleasantville car 59 only had an in car video system. The system was examined and showed no video recorded on the date and time of the incident.

The Mount Pleasant cars on scene when I arrived were not equipped with in car video or LPR's. I was advised that the cars are equipped with a GPS system that records in the Mount Pleasant Headquarters. Lt. Fannelli of the Mount Pleasant Police was advised to preserve these records for future use in the investigation.
